

London

Campaign to Protect Rural England

2018 LOCAL ELECTIONS

WHAT WE WANT TO HEAR FROM LONDON'S LOCAL ELECTION CANDIDATES...

“We will safeguard existing green space, Green Belt or Metropolitan Open Land” by

1. maintaining a comprehensive inventory of Green Belt and Metropolitan Open Land
2. opposing building proposals which would lead to loss of green space
3. strongly resisting tree felling

“We will make our streets and public spaces safer and more pleasant with reduced traffic” by

1. promoting opportunities for ‘resident-access-only’ roads and ‘homezones’
2. supporting quiet routes and more ‘shared space’
3. greening our streets with landscaping, green verges and tree planting

“We will provide genuinely affordable housing on existing developed land” by

1. using up to date brownfield registers to secure well designed new housing
2. promoting local plan policies to redevelop underused industrial and retail sites
3. supporting policies to intensify development around tube and rail stations

PRIORITISING PARKS

“We will make it a priority to secure well-maintained and well-used parks” by

1. supporting the management of parks and greens spaces to best practice standards
2. committing adequate long-term resources for maintenance and improvement
3. encouraging community engagement by supporting local park friends groups

“We will make our parks more beautiful and tranquil with less noise and air pollution” by

1. enhancing the quality of green spaces
2. re-routing traffic and introducing traffic free days around noisy, polluted parks
3. designing, dimming, or turning off street lighting to save energy and money

AND “We will help make London a National Park City” by

declaring our ward's support for the campaign!
